SHAPING A ZERO-ACCIDENT FUTURE

BREMBO RETAINS CDP'S HIGHEST RATING FOR ENVIRONMENTAL SUSTAINABILITY

Brembo ranks among the world's leading companies in tackling climate change and managing water resources

Bergamo (Italy), 18 November 2026 – Brembo has been recognised among the global leaders in environmental sustainability, retaining its place on CDP's A List. CDP is the non-profit organisation that runs the world's only independent environmental disclosure system. Based on the data reported in its latest Annual Report, Brembo achieved a double-A rating, the highest score in both the climate change and water security categories.

This recognition reflects the progress Brembo has made in managing its environmental impact. In 2025, electricity from renewable sources accounted for 88% of the Group's electricity consumption, up from 84% the previous year. Renewable electricity reached 100% in Italy, Mexico, Brazil and Spain. Scope 1 and 2 emissions per tonne of cast material fell by 24% compared with 2024 and by more than 67% compared with 2020. In 2025, Brembo also recycled almost 100,000 cubic metres of water – the equivalent of around 40 Olympic-sized swimming pools – and achieved its target of measuring water withdrawals, significant water uses and discharges at all its production sites worldwide.

«At Brembo, we address sustainability through concrete targets and shared criteria across the Group. The data collected in different countries help us understand which actions are effective and extend their impact. CDP's confirmation of our double-A rating recognises the strength of this shared effort», said Andrea Rocco, Chief Sustainability & Risk Officer at Brembo.

The double-A rating, which Brembo also achieved in 2025, reflects a coordinated global effort. All Brembo sites across the 18 countries where the Group operates contributed data, which were collected and processed by a central multidisciplinary team of engineers, environmental scientists and chemists to ensure the quality and accuracy of the information submitted.

CDP, formerly known as the Carbon Disclosure Project, is a global non-profit organisation that has measured the environmental performance of companies, cities and organisations for 25 years. Its annual assessment is widely recognised as the global benchmark for corporate transparency and environmental action, combining leading reporting standards with advanced frameworks. CDP analyses data from more than 22,000 companies each year, and its ratings are used by financial institutions representing more than a quarter of global institutional assets.

Brembo

Brembo is a global mobility innovation leader developing advanced solutions for vehicles and racing applications. Driven by its purpose, "Shaping a Zero-Accident Future", Brembo combines industrial excellence and digital innovation to make safety, performance and sustainability integral to the driving experience. Through its brands – AP Racing, ByBre, Brembo, J.Juan, Marchesini, Öhlins and SBS Friction – the Group delivers an integrated ecosystem of technologies, including braking systems, dampers, clutches and wheels, as well as AI-enabled software solutions. For more than 50 years, the Brembo Group has been a key player in top-level motorsport, supplying teams competing in the most prestigious championships and contributing to over 1,000 titles won. Founded in 1961 and headquartered in Bergamo, Italy, Brembo has been listed on the Milan Stock Exchange since 1995. The Group employs 16,000 people across 18 countries, with 39 production and commercial sites, 10 R&D centers and 2 Brembo Inspiration Labs. In 2025, revenues totaled €3.7 billion.
