

13 CLIMATE ACTION

GOAL 13

PROMOTE ACTIONS AT ALL LEVELS TO ADDRESS CLIMATE CHANGE

TARGET

- Keep global warming below 2°C by the end of the century and strive to limit it to 1.5°C (Paris Agreement, December 2015).
- Promote actions against climate change caused by emissions of CO₂ and other greenhouse gases.

ACTIONS

- Integrate climate change measures into the policies, strategies and planning of governments and institutions.
- Improve education and support innovation to mitigate and tackle climate issues.
- Encourage a reduction in environmental impact through the use of renewables, proper waste recycling and reduced consumption.
- Drastically reduce fossil fuel consumption.

WHAT WE CAN DO TOGETHER

- Give priority to alternative modes of transport other than the car.
- Use shared mobility schemes such as car sharing or electric vehicles such as bikes or monowheels.
- Switch off all electronic devices and electrical appliances when not in use.
- Use more energy-efficient lighting and heating systems.
- Recycle waste correctly to prevent unnecessary emissions.

transparency on
climate change

13 CLIMATE
ACTION

BREMBO'S COMMITMENT

REDUCE GREENHOUSE GAS EMISSIONS AND
IMPROVE ENERGY EFFICIENCY

The CDP (Carbon Disclosure Project) is a global non-profit organization that helps companies to measure and manage information on their environmental impact. Brembo has been acknowledged by the Carbon Disclosure Project as one of the leading 37 global companies as far as its commitment and ability to respond to climate change as well as water resource management is concerned. Brembo is the only Italian company that has been awarded a double “A” in the “Climate Change A List” and “Water Security A List”.

TARGET

- By 2025, a 19% reduction in direct and indirect emissions compared with 2015 levels.
- By 2040, a 41% reduction in direct and indirect emissions compared with 2015 levels.

ACTIONS

- Define medium- and long-term goals to reduce greenhouse gas emissions.
- Improve energy efficiency in the production processes.
- Gradually increase the amount of energy from renewable sources.
- Monitor energy consumption using a constantly expanding platform shared by all the plants in the Group.
- Promote dedicated technological investment programs and research projects.

RESULTS

- A 1.8% reduction in energy consumption in 2018 compared with 2017.
- A 18.78% reduction in CO₂ emissions due to improvements made in 2018 compared with 2017.
- Approximately 21% of energy used in 2018 came from renewable sources.
